

Volunteers Needed!

Do you have Fibromyalgia? **Do you ache all over?**

Do your muscles twitch tingle or burn for no reason?

Do you have widespread muscle pain and fatigue that limit how much you can do in a day?

Do you have areas around your neck and shoulders that are tender to the touch?

Do you have muscle stiffness and pain that seems worse in the morning?

Do you have trouble falling asleep and staying asleep?

Have you missed activities with family or friends because you were too tired or in pain?

Millions of Americans, like you, experience real pain and real fatigue that affect every part of your life.

WHAT IS THE PURPOSE? All of the above may be symptoms of Fibromyalgia. Volunteers are needed for a research study evaluating the **Role of MRI and Physical Therapy in evaluation and management of Fibromyalgia.**

WHO CAN PARTICIPATE?

Potential participants should:

- Have a moderate-to-severe level of daily pain
- Be age 18-65
- Not be taking any opioid analgesics or other strong painkillers.
- Willing to come off medications for fibromyalgia
- Willing to undergo MRI scans

Plus other criteria apply

If you qualify for this study, you will receive all study-related examinations, lab work and physical therapy at no cost and may receive compensation for your time and travel.
